DETAILED ACTION

Claim Numbering

1. The claim numbers need to be fixed as claims 1-24 are correct and then after claim 24, the claim numbering is switched to 21-30 (there should be 34 claims total). This is to be fixed in the response to this restriction and the examiner reminds the applicant to fix the dependant claims as well. For example, the examiner does not know if second claim 21 goes to original claim 20 or if it goes to the claim above which is original claim 24.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-23 and 27-34?drawn to a valve combination, classified in class 251, subclass 11
 - II. Claims 24-26?, drawn to a valve subcombination, classified in class 251, subclass 318.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the hook and opposing barbs are not claimed. The subcombination has separate utility such as in a beverage dispenser.

Art Unit: 3751

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
